Career Objective

Motivated B.Tech student seeking an opportunity in an AI-first, cloud-driven environment. Passionate about application development, data, and building scalable solutions. Eager to learn from experienced professionals and contribute to real-world projects. Committed to continuous growth in a dynamic, innovation-driven environment.

Education

Graduation: **2023 - 2027**
Pranveer Singh Institute of Technology, Kanpur **CGPA: 70%**

Intermediate: **2022 - 2023**
Shivaji Inter College **70%**

High School **2020 - 2021**
Shivaji Inter College **89.6%**

Technical Skills

Programming: Python, Java

Core CS Fundamentals: Data Structures & Algorithms, OOPs, DBMS, Operating Systems

Software Development: SDLC

AI / Machine Learning: Basic ML concepts, data preprocessing

Generative AI: LLMs, Prompt Engineering (basic understanding)

APIs & Data Handling: REST APIs, automation basics, data manipulation

Projects

MedBox – Symptom-Based Healthcare Recommendation System | July 2025 – October 2025

- Developed a healthcare recommendation system that analyzes user-input symptoms and suggests possible medicines using Python.
- Implemented data processing and basic predictive logic to map symptoms with diseases.
- Built responsive web interfaces using HTML5 and CSS3 for symptom input and result display.
- Designed wireframes and UI prototypes using Figma to improve user experience.

Student Performance Prediction System | December 2025 - February 2026

- Developed a Machine Learning model to predict student performance based on historical data.
- Performed data preprocessing, feature selection, and model evaluation.
- Applied algorithms like Linear Regression / Decision Trees for prediction.

- Highlights strong fundamentals in ML, data handling, and analytical thinking.

Certifications

Fundamentals of Python	Infosys Springboard | 2024
Java Basics	Infosys Springboard | 2024
